## Make Sustainable Palm Oil the Norm!

- **Don't boycott products** that contain palm oil; buy from sustainable brands instead. Palm oil produces more oil per hectare of land than other oils, so when grown sustainably, it is an environmentally-friendly ingredient.
- **Encourage companies** to use the certified sustainable palm oil logo on their products—very few do, even though they use sustainable palm oil.
- **Contact** your favourite companies and urge them to go sustainable.
- Share what you learn with others.
