

Habitats and Biodiversity

What is biodiversity?

Write the letter A, B or C next to each image to match these species to the way in which they catch their prey:

Redside dace: _____

A. By filter feeding (algae)

Lake Sturgeon: _____

B. By leaping from the water to catch surface insects

Freshwater Mussels: _____

C. By sucking their prey out of the substrate

What are three actions that you can take to help protect the Great Lakes, the species that live there and the planet?

1. _____
2. _____
3. _____
